

## Elan Easi-Mute – Audio Integration Products

Firstly choose your vehicle specific Elan Easi-Mute kit

### EZK-xxx

The Elan Easi-Mute kit comprises of a vehicle specific harness (EVH-xxx) and an Easi-Mute Box (EMB-001)

EVH-xxx

EMB-001

Then choose your Car-kit specific accessory harness (EAH-xxx)

EAH-xxx

### Key Features:

- Four relay mute module enabling switching of 6 vehicle speakers simultaneously, whilst phone audio is played through the vehicle front speakers.
- Internally fused with re-settable automotive thermal fuses.
- Short circuit protection, to protect the module from short circuit and incorrect power configuration.
- Time out delay when call is ended to ensure audio quality is not compromised when switching between radio and phone call.
- Isolated mute Input / Output to protect Car-kit from current overloading.
- Detachable 'T' shaped harness for easier cable routing and installation where space is restricted.
- Easily Interchangeable Car-kit harnesses for future phone upgrading.
- Plug & Play modular product reduces installation time.
