

Elan ISO to Car Adaptor Harness (ITC-xxx)

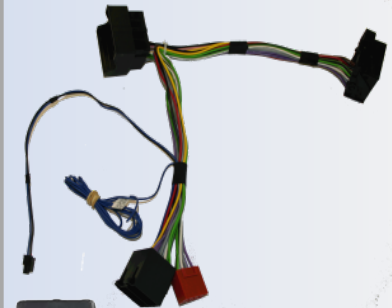

The ITC-xxx harness range can be used to adapt and install any aftermarket equipment that is terminated with ISO type connections for example, hands-free car-kits, iPod/MP3 music devices etc, by converting the ISO connections to the vehicle specific connectors required for the vehicle you are installing. The ITC-xxx range of harnesses are plug and play and they connect in between the equipment you are installing and the vehicle audio system, preventing you from having to cut the vehicle wiring harness and invalidate the vehicle warranty.

Key Features:

- Longer cable length than typical ISO to vehicle products providing (500mm) from the ISO connectors to the vehicle radio connector, enabling easier cable routing, more location flexibility and faster installation.
- Plug & play concept which carries on the Elan philosophy*
- 'L' shape cable harness to enable easier refitting of the vehicle radio unit
- Provided with a terminated power cable that allows you to make a plug & play power connection that will connect to any of the 2nd Generation (971xxx) Brodit fixed installation charger holders.

**Some products do have external cables that may require some connectivity to vehicle and these cannot be made plug & play.*

Kit Contents:

ISO to Car Harness (ITC-xxx)

Brodit Charger Box (971-xxx)

Please Note:

The Brodit Charger Box is NOT included in the ITC-xxx Kit!
